

Lake of the Woods One Watershed One Plan UPDATE

Volume 2

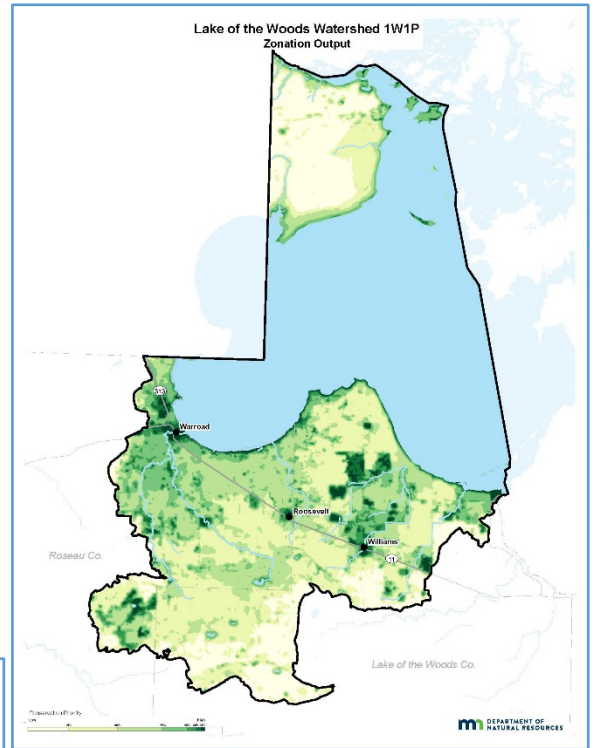

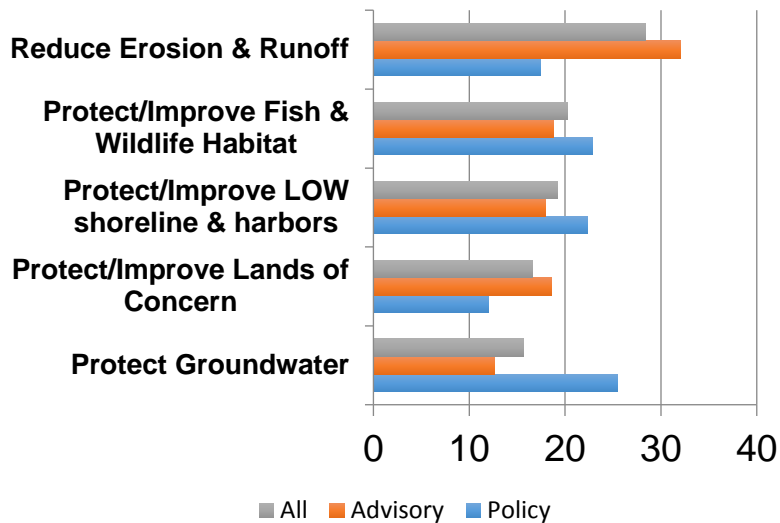

December 2017

News:

- In November the Advisory Committee met & reviewed:
 - Section 2 of the Plan: This section prioritizes the 48 issues. Issues were prioritized utilizing all of the input received
 - Maps to accompany Plan Section 2
 - Implementation Tools including:
 - Measurable Goals
 - Actions and Strategies
 - Zonation Results

Zonation Survey Results

(values range from 0-100, sum to 100)

WHAT IS ZONATION?

Zonation is a value modeling tool that helps to prioritize areas for watershed planning efforts. The Policy and Advisory Committee utilized MN DNR Staff to complete the Zonation process to assist in prioritizing for the watershed.

The map above: shows a gradation of priority areas based on survey information. The darker the area on the map, the higher the priority.

The table to the left: shows the some of the survey data ranking values by the Advisory & Policy committees.

Calendar:

- December 20th, 2017: *Policy Committee* meeting which will include reviewing and taking action on the items recommended by the Advisory Committee.
- January 17th, 2018: *Advisory Committee* meeting
